DENTICATOR[®] has been a pioneer in the dental industry since 1931. Our latest innovation, the **Denticator Eco** propphy angle, is designed in the same spirit of innovation clinicians have trusted for decades, only greener.

Denticator Eco is made with **25% less plastic** than leading disposable propphy angles.* The Denticator Eco 125ct box is **biodegradable, compostable** and made with **100% recycled content**, while the 1000ct box is made with **35% recycled content**.* These propphy angles also come individually wrapped in recyclable film.

By purchasing Denticator Eco propphy angles, you are helping create a greener dental environment. Thank you for continuing to inspire us to make some of the most innovative products in the dental industry.
